

Have you seen wild dogs in your local area?

WildDogScan is a new web-mapping system for landholders to record wild dog activity in their local area.

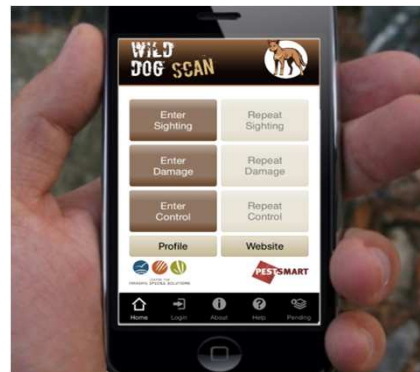

- Record sightings, wild dog evidence, impacts (such as mauled stock), and control activities (such as baiting).
- Keep local authorities updated about current wild dog problems.
- Join or create a landholder group to monitor wild dog activity, stay informed about wild dog attacks, and work together.
- Receive updates about local wild dog activity.
- **Visit – www.wilddogscan.org.au or download the Mobile App**

FeralScan is managed by the Centre for Invasive Species Solutions and supports regional NRM groups, wild dog control associations, and landholder groups.

How to record wild dog activity in WildDogScan

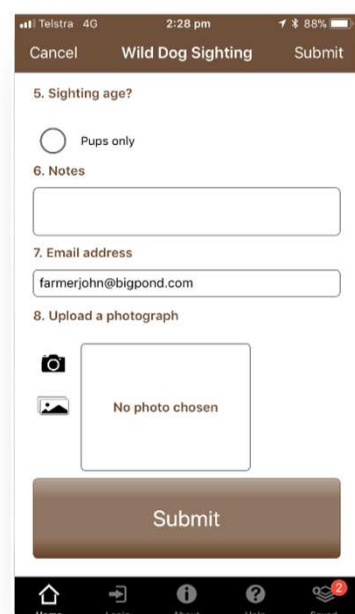

Option 1. Go to the website
www.wilddogscan.org.au

1. Register your details and Login, or record data using your email address.
2. Record where you have seen wild dogs, evidence, damage, or control actions.
3. Submit your record, and view it on the WildDogScan map.

Option 2. Download the free Mobile App (Apple/Android).
