

How to add a wildlife camera image when recording a new entry into FeralScan

1. Insert your SD card

Insert your SD card into the card reader on your laptop or desktop computer, then click the 'Choose file' button in the FeralScan form.

Record data ×

What information would you like to add?

Sighting
 Damage
 Control

1. Date observed *

2. Click on the map or type your coordinates:

Latitude *

Longitude *

3. Add a photograph

4. Display this record to all users
 Restrict this record to my group(s) (private)
 Continue adding records

2. Select your image

Click to open the relevant folder containing your image (e.g. from your hard drive or camera SD card). Select the best image, then click 'Submit' in the form to confirm.

Photographs you upload will be displayed within FeralScan for you and others to view.
